Wood Carpet	281

In all orders sent us where patterns or designs
are specified by number we will understand
that the number is taken from this book
if it appears therein, unless the order
specifies the number is taken
from some other book.

Order by Number Only.

Do Not Cut this Book.

When ordering from
other books than ours do not fail
to specify from whose catalogue the num-
bers are taken and the date of issue of the book.

TO THE TRADE.

After examining this, our new catalogue, we are confident you will agree with us that it is the most complete book of its kind ever issued. No effort has been spared by us to make it attractive, comprehensive and best adapted to the convenience and requirements of the trade.

We wish to call your particular attention to the many new designs and ideas contained therein, and at the same time to emphasize the fact that our facilities for furnishing all kinds of mill work are unsurpassed.

We solicit your orders and will endeavor to handle them in a manner that will be satisfactory to you.

Write to us for any desired information and we will be pleased to be of service to you.

Very truly yours,

FARLEY & LOETSCHER MFG. CO.

Dubuque, Iowa, June 1st, 1898.

DIRECTIONS for ORDERING.

Much valuable time can be saved in closely following these instructions. Be explicit—do not assume that we know what is wanted.

Always give width first in specifying sizes; *this applies to everything.*

Orders for Sash should state number of lights in window, size of glass, thickness, whether plain or check rail, glazed or open. If glazed, state single or double strength glass; if not stated, we will glaze single strength. For segment top windows, always give the radius of the segment, otherwise we will make the regular radius, which is the width of the opening. For circle head and segment head windows, always state whether they are wanted to finish circle inside and outside, like plans 1 and 3, on page 10, or to finish circle on outside only, as plans 2 and 4 on same page; also, where frames are made; we should have width and height inside of the frame in the clear. If no measurements are given, we will always make windows to correspond with size of windows as given in this list.

In every case where our regular sizes and styles are not used, please specify the openings to fill, in addition to giving number of lights, glass size, and furnish complete description.

Orders for doors should state size, thickness, number of panels, and quality; if moulded, say if one or more sides; flush or raised moulding. To patterns in this or other catalogues, refer by number. If design is taken from any other catalogue, state from whose book it is taken, and the date of issue.

Orders for outside blinds should state number of lights in window, size of glass, thickness of blinds, stationary or rolling slats; if for segment head windows, give radius.

Doors, Blinds and Sash, are often ordered $1\frac{1}{4}$, $1\frac{1}{2}$ and 2 inches thick. Do not use these terms, as it only delays orders. The regular thicknesses are $1\frac{1}{8}$, $1\frac{3}{8}$ and $1\frac{3}{4}$ inches. We can make them $1\frac{1}{4}$, $1\frac{1}{2}$ and 2 inches, at extra price.

Orders for inside blinds should state *exact size* of opening (outside measure) and thickness, the number of folds, and if panels or slats, and where blinds are to be cut. If of patterns shown on page 40 refer by number or make sketch if special.

Orders for outside door frames should state whether for a frame or brick building, also width and thickness of jambs, and whether made with rabbet or stop.

Orders for window frames, other than box frames, state if for plain or check rail sash, with or without pulleys, giving width of jambs. For inside door jambs, give the width and thickness of the jamb, and whether with rabbet or stop. Window frames and inside door jambs are always furnished *without stops*, unless otherwise ordered.

Orders for mouldings should give plainly the number of the moulding. If special moulding, give exact detail or sketch.

Refer by number in catalogues, or send sketches, as far as possible, of anything other than shown in this or other books.

GRADES OF
SASH, DOORS and BLINDS.

Adopted by the Wholesale Sash, Door and Blind Manufacturers' Association
of the Northwest, February 1, 1898.

DOORS.

No. 1 Doors.—Material in No. 1 Doors must be clear, with exception that water stain and white sap and small pin knots, not exceeding one-fourth inch in diameter, may be admitted. Workmanship must be good. The Standard No. 1 Door may be glued, wedged, and pinned, or glued tenons without pins.

No. 2 Doors.—Material in No. 2 Doors may contain knots not to exceed three-quarters inch in diameter, and blue sap showing on both sides not to exceed fifty per cent in any one piece of the door, and gum spots showing on one side only, and other slight defects, but the total number of defects (not including blue sap) shall not exceed ten in number on each side. Slight defects in workmanship admitted.

No. 3 Doors.—Material in No. 3 Doors may contain stained sap and knots not exceeding one and one-half inches in diameter, also small worm holes showing on one side only, and slight streaks of fine shake. Fifteen defects other than sap stains and worm holes on each side may be allowed, also slight defects in workmanship. Panels made of woods other than white pine are admitted.

WINDOWS.

Check Rail Windows may contain not to exceed two knots in each piece of the sash, said knots not to exceed three-eighths inch in diameter. White sap and a small amount of blue sap may be admitted. Workmanship must be good.

Plain Rail Windows and Sash may contain blue sap and (small) knots.

BLINDS.

Outside Blinds must be made of clear lumber, except that small, sound pin knots and white sap may be admitted. Workmanship must be good.

CIRCLE and SEGMENT TOP WINDOWS.

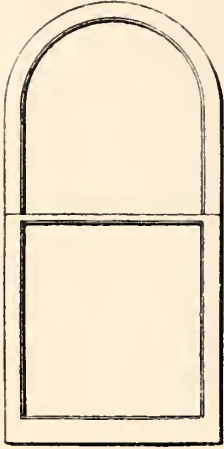

Fig. 1
Circle inside and outside.

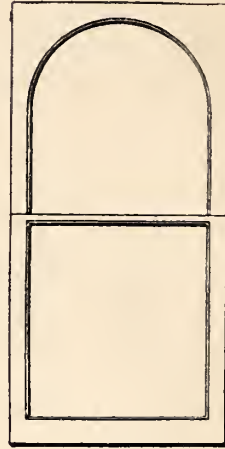

Fig. 2
Circle outside, Square inside.

Fig. 3
Segment inside and outside.

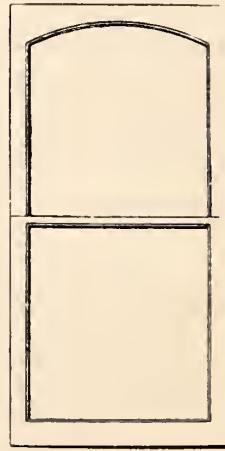

Fig. 4
Segment outside, Square inside.

Windows made in the above styles can be filled with any number of lights required.

N. B.—A window indicates two pieces. A sash indicates one piece. A pair of blinds indicates two pieces. A blind indicates one piece. A set of sash or blinds indicates more than two pieces, and order should be accompanied with sketch.

FIFTEEN and EIGHTEEN LIGHTED WINDOWS.

For Fifteen Light Windows, open, add to Open list of Twelve Light, one-third. For Eighteen Light Windows, open, add to Open list of Twelve Light, two-thirds. For Fifteen Light Windows, glazed, add to Glazed list of Twelve Light, one-quarter. For Eighteen Light Windows, glazed, add to Glazed list of Twelve Light, one-half.

#-The above applies to either Plain or Check Rail Windows.

For price of 1½ inch Check Rail Windows, deduct 10 per cent from list of 1½ inch Open Check Rail Windows, same size. All Check Rail Windows planed and bored. For prices on Segment and Circle Tops, and other extras, see list of Sash Extras, page 37. For Windows 1½ inches thick, add to list of 1½ inch Open Windows, 50 per cent. For Windows prepared for Oil Finish, add 20 per cent to the Open list. Sizes not listed, extra price.

When ordering windows always say if wanted Glazed or Open.

Sizes not listed, extra price.

INSIDE BLINDS.

DIRECTIONS FOR ORDERING.

First—In all cases give the exact outside measure of Blinds wanted.

Second—Give the number of folds.

Third—State if Blinds are to be all slats, or half panels and half slats.

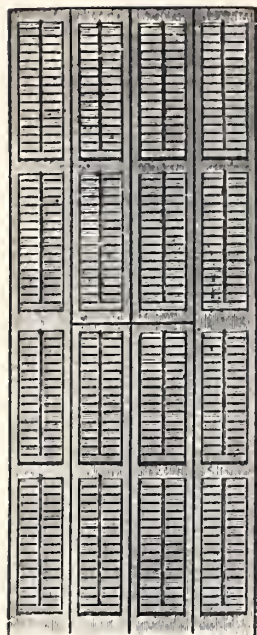

Fourth—State distance from top of window to center of meeting rail of sash, or where Blinds are to be cut.

Fifth—Give thickness of Blinds.

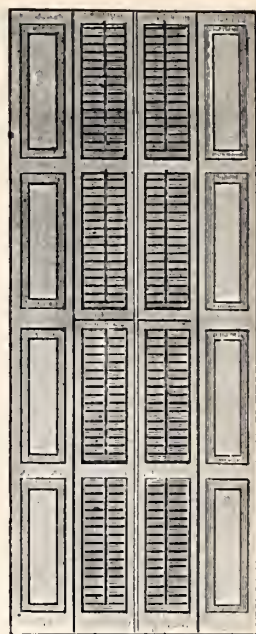

Sixth—If Blinds fold in pockets, give size of pockets.

Seventh—State if Blinds are to be painted or finished in oil.

Eighth—If for oil finish, extra price.

180
All Slats.

181
 $\frac{1}{2}$ Panels, $\frac{1}{2}$ Slats.

PRICES.

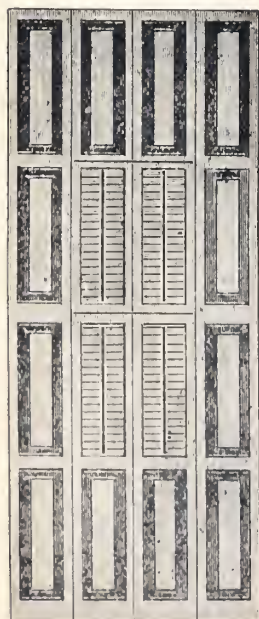

1 $\frac{1}{8}$ inches O. G. Stiles and Rails, Bevel Panel or Rolling Slats, measuring height of window, per foot:	
Two-fold, up to and including 2 feet wide	\$0.85
Three-fold, up to and including 2 feet 11 inches wide	1.10
Four-fold, up to and including 2 feet 11 inches wide	1.25
Four-fold, over 2 feet 11 inches wide and under 4 feet	1.40
Six-fold, over 2 feet 11 inches wide and under 4 feet	1.65

For $\frac{7}{8}$ inch deduct 5 per cent.

The above prices are for Pine.

If hardwood, such as Cherry, Ash, Maple, or Black Walnut are wanted, we charge extra price.

We make Inside Blinds that are not excelled, either in workmanship or style, in any market.

182
 $\frac{1}{2}$ Panel.

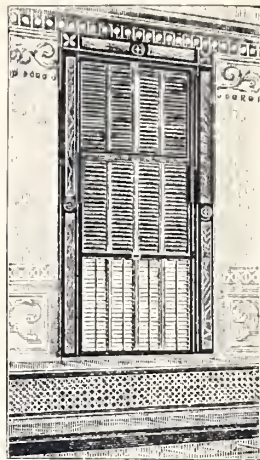

183
All Panel.

INSIDE SLIDING BLINDS.

These Blinds are usually made in three sections, the two upper sections having stationary slats and the lower section only having rolling slats. They are made in two, three, four or more divisions, according to width of window.

The cut shows the blinds as they are mostly used, i. e. three sections and four divisions. An arrangement of **panels** and slats can be substituted in place of all slats, if desired.

All necessary hardware and fittings are furnished with the blinds.

MEASUREMENTS.

Give exact width of window between jambs and height from window sill to top jamb.

PRICES ARE PER LINEAL FOOT IN HEIGHT.

WOOD AND FINISH.	2 Division, Under 24 in.	3 Division, 24 to 32 in.	4 Division, 32 to 40 in.	5 Division, 40 to 48 in.	6 Division, 48 to 60 in.

Oil Rubbed Cabinet Finish.....	1.10	1.30	1.50	1.75	2.00

VENETIAN BLINDS.

Cut shows the blinds as used in a **double** or Mullion Window.

In the left-hand window the blind is partly raised, the slats being arranged to exclude the light. In the right-hand window the blind is lowered, with the upper slats arranged to admit light, and the lower ones to exclude it. In the blind each slat is independent in its action, consequently any number of slats can be closed or left open at will and in any desired part of the blind. The control of light and air is therefore practically absolute in these blinds.

MEASUREMENTS.

Give exact measure, width and height of the opening in which the blind is to hang.

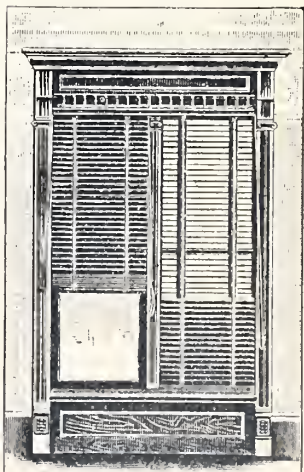

PRICES PER SQUARE FOOT.

VARIETIES OF WOOD.	1½ inch Slats.	2 inch Slats.	2½ inch Slats.
Spruce, Whitewood, Basswood and Yellow Pine.....	24c.	21c.	19c.
White Pine, Cypress, Hazel, Plain Oak, Ash, Elm, Chestnut, Ordinary Maple.....	27c.	23c.	21c.

DIRECTIONS NECESSARY FOR ORDERING STAIRS
and STAIR RAILING.

When a flight of stairs is wanted, we should know the height of story from floor to floor, width of joists in second story, width and run of stairs, the size of cylinder, style of base used in the hall, with rough sketch showing about the shape of stairs wanted.

For STAIR RAILING—Straight Flight.

We require the width of rise and step as sawed out on string board, the number of risers, the size of cylinder from face to face of string or face board, which way it turns at head of stairs, and the number of feet of straight rail required at landing. Unless we receive plan showing otherwise, we always suppose the top riser for a straight flight of stairs to be placed at the edge or spring of cylinder.

For CIRCULAR or WINDING STAIRS.

We should have an exact plan of stairs as built, giving the width of rise and step, the location of risers in cylinder, etc.; and, when there are straight steps below or above the cylinder, always give the distance from the first square riser to the edge or spring line of cylinder, on the face of string or face board. *Always write your address in full on the plans.*

1239. \$1.20 per square foot.

Above prices are for Grilles "in the white."

Made of White or Yellow Pine, Cypress, Oak, Ash, Birch, Maple or woods of equal value.

HARDWOOD MANTELS.

THE modern home is not complete, now-a-days, without Mantels and Fire Places, as the latter add greatly to the furnishings and are conducive to the comfort and good cheer of the entire household.

No one can afford to be without them as prices are within the reach of all. The designs shown herewith are new and attractive and we feel sure are varied enough to suit the most exacting customer.

Mantels are made in Oak, natural or antique finish; in Red Birch, natural finish; in Red Birch to imitate Cherry and Mahogany. More expensive woods, such as Curly Birch, solid Mahogany, etc., cost extra. All Mantels are made with adjustable wall plates to fit any chimney breast from 4 feet - 10 inches to 5 feet - 4 inches wide. The Tile for hearths and facings can be furnished in all colors. If the selection is left with us, we send the color which we consider best harmonizes with the woodwork of Mantel.

At prices given we send Mantels complete, excepting fire brick, as the latter can be bought of your local dealer and you thereby save freight on the fire brick. Always specify size of chimney and kind of wood wanted.

HARDWOOD MANTELS.

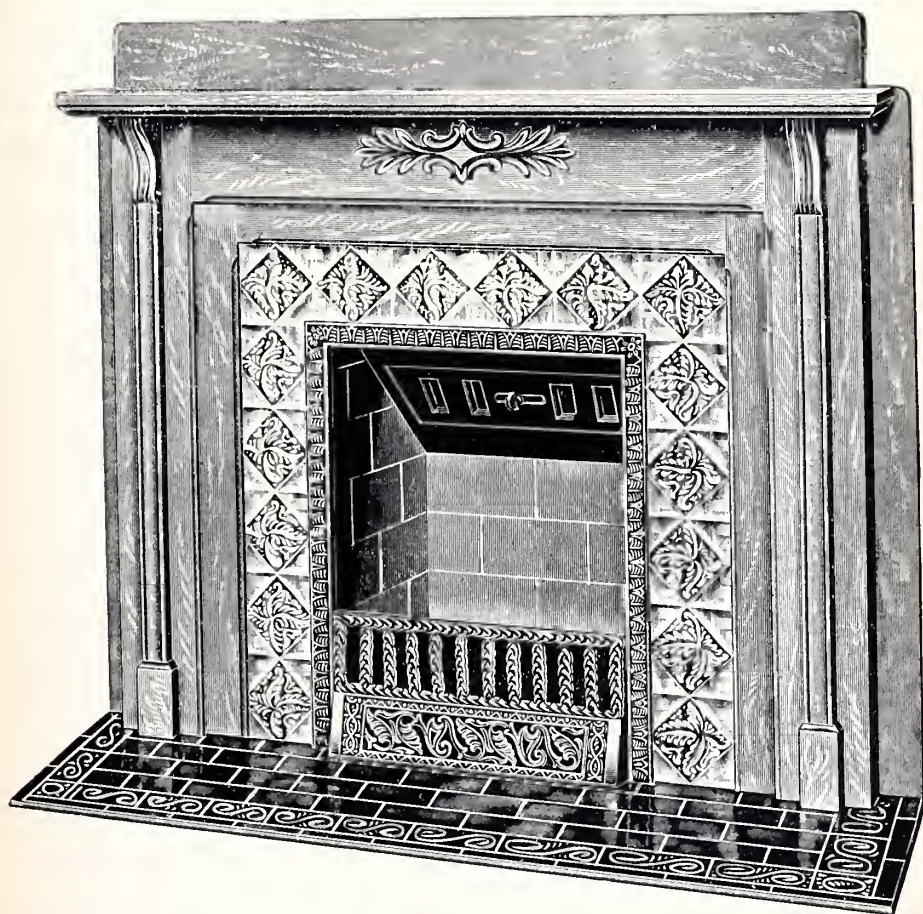

1250

Price, as shown opposite, club house grate, coal burner, \$23.50

Price, as shown opposite, substituting asbestos grate, gas
burner. See design 1257, - - - - 26.50

NOTICE.

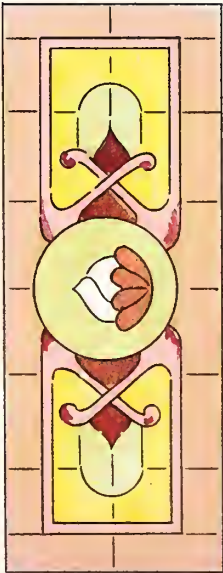

THE following pages descriptive of Leaded Glass will speak for themselves, as far as regards the beauty and variety of the designs. The prices we have established for this class of work are for the designs made fully up to the grade called for by the illustrations—not for imitations which might be furnished at lower prices. In Leaded Glass, more than in anything else, the price paid regulates, or should regulate, the value received. At our prices we will give full value and the work will not be slighted by using the cheaper grades of Colored Glass, as is very often the custom of cheap competition. We use in this work the best imported Venetian, combined with Ondoyant, Opalescent, Muranese and Cut Jewels. We solicit your orders and will guarantee fullest satisfaction.

POLISHED PLATE GLASS.

ODD and fractional parts of inches are charged at the price of the next highest even number. Irregular shaped glass, or glass cut to pattern, will be charged as it squares. No special thickness guaranteed; but when heavy plate is required, and so ordered, care will be exercised in selecting the heaviest in stock at the time.

Discounts apply to "glazing quality" only, and to glass of ordinary thickness. Selected glass and special thickness, charged at special prices.

Glass exceeding the sizes comprised in the tables will be furnished at special prices.

On all orders amounting to less than \$100 net, or for less than three plates of whatever value, boxing will be charged at the rate of 6 cents per square foot lid measurement. Said measurement to be six inches larger each way than the widest and the longest plates in the case.

TO APPROXIMATE WEIGHT OF POLISHED PLATE GLASS BOXED.

Extend the glass at $3\frac{1}{2}$ lbs. per square foot. Weight of box equals the contents of a plate of greatest width and length of those packed therein multiplied by 10.

Thus:

$$\begin{array}{l} 1 \text{ plate } 36" \times 96" \\ 1 \text{ " } 60" \times 84" \end{array} \left. \vphantom{\begin{array}{l} 1 \text{ plate } 36" \times 96" \\ 1 \text{ " } 60" \times 84" \end{array}} \right\} = 59 \text{ ft. } \times 3\frac{1}{2} \text{ } 206\frac{1}{2} \text{ lbs.} \\ \text{Size of box } 60" \times 96" = 40 \text{ ft. } \times 10 \text{ } 400 \\ \hline 606\frac{1}{2} \text{ lbs.}$$

POLISHED PLATE GLASS.

Official List, July, 1895.

PRICES of CHURCH FURNITURE.

Pages 272, 273 and 274.

These prices are based on plain-sawed red oak for all pew ends and pew body, except where otherwise mentioned, and quarter-sawed red oak for all pulpit furniture. All pew work finished with hard oil finish, without rubbing, and includes, when the entire pew is furnished, all the nails, screws and other hardware necessary to put the work together and in place on the floor. All pulpit furniture to be finished and rubbed to a smooth even surface.

5 feet wide, Oak.....\$36.00.

THE SHANNON LETTER and BILL FILE.

The Shannon Letter and Bill File is the most convenient and complete file made. Papers are neatly and uniformly perforated with the file perforator, are then filed between index sheets and pressed compactly together, and kept free from dust by means of the compressor cover, which also serves as a record of transfers made from file to binding case.

The Shannon File has no equal for strength and durability. The clip and perforator are constructed in the strongest possible manner and of the very best material; in fact, everything about the File is made with a view to years of usefulness.

MADE IN THREE SIZES.
Note, Letter and Invoice.

- Style "A," as shown in cut.....each, \$1.25
- Style "E.P." with Board, Arch and Perforator onlyeach, 1.00
- Style "E," Board and Arch only.....each, .65

Style "A" File, comprising Board, Arch, Index, Perforator and C. C. Cover.

THE SHANNON FILING CABINET.

A number of Shannon file drawers fitted together into a case, provided with necessary indexes and appropriate labels, constitute the Shannon Filing Cabinet. It affords a greater classification of business papers and correspondence and gives the additional advantage of convenient access to papers covering a considerable period of time. With the Shannon system any arrangement or subdivision of correspondence desired can be had, and the requirements of the purchaser are the guide in the selection of a cabinet, both as to the number of file drawers and the labeling and indexing of same.

The fact that any one file drawer may fill up more rapidly than another, because of more papers being received from certain sources than others, does not mar the uniformity of the system. The contents of file drawer can be transferred at any time to a binding or transfer case and reference not impeded, the separation of the subjects of each file drawer being still carried out.

DIMENSION SHINGLES.

We are prepared to furnish Ornamental Shingles, cut to any shape desired, and can offer inducements in prices. Write for quotations.

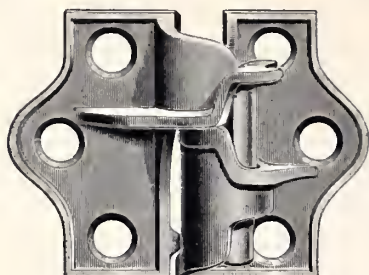

SHINGLES REQUIRED IN A ROOF.

To the square foot it takes 9 if exposed 4 inches; 8 if exposed $4\frac{1}{2}$ inches, and $7\frac{1}{2}$ if exposed 5 inches to the weather.

Find the number of shingles required to cover a roof 38 feet long and the rafters on each side 14 feet. Shingles exposed $4\frac{1}{2}$ inches.

Ans. $28 \times 38 = 1064$ (sq. ft.) $\times 8 = 8512$ shingles.

BLIND HINGES and NON-DETACHABLE and DETACHABLE SPRING SCREEN DOOR HINGES.

The "Ideal" Blind Hinge.

When the blind is swung open the space is *entirely free to receive a storm window the full size of the opening*, without cutting away the edges. Any method of securing the storm sash in place may be employed as the hinges leave the opening full size and free from obstruction, an advantage that will be appreciated. Upon the underside of each leaf of the hinge are arranged two lugs or guides to set it by, thus enabling the workman to apply the hinge quickly and always get it straight. The "Ideal" hinge positively holds the blind open no matter how fierce the storm may rage, this being accomplished by the hold-open or lock-back feature.

Non-Detachable Spring Screen Door Hinge.

Detachable Spring Screen Door Hinge.

Cut of Plate that remains on the casing when door is taken down.

For prices see our Discount Sheet.

BLIND HINGES.

Packed 12 sets in a box with fasteners but without screws.

SPRING SCREEN DOOR HINGES.

Packed 6 sets in a box, complete with screws, knobs and hooks and eyes.

PATENT ROTARY FASTENERS

FOR STORM SASH AND WINDOW SCREENS. ❁❁❁

Don't fasten your Storm Sash and Window Screens to your windows with screws or buttons from the outside in the old way. Avoid all this trouble and dangerous climbing by using the "ROTARY" fastener which can be applied and operated from the inside of a room with the least possible trouble.

Figure 1 shows the "Rotary" fastener as applied to an ordinary window with one set (four fasteners) to a window. The two upper fasteners are shown in their locked position, while the two lower ones appear with the slots in position to enter the cam flange over the pins in the window frame and the handles for drawing the sash inward until the pins engage with the flange on the fastener.

Figures 2 and 3 give the same illustrations enlarged to about one-half full size.

The "Rotary" is highly approved by architects, contractors, dealers and users.

It is the best device of its kind yet invented, because : It is the cheapest. It is the simplest. It is the most practical. It is the strongest and most durable. It is easily applied to either new or old sash. It can be applied to storm sash whether fitted between the hanging stile or put on the outside of the casing. It has no screws or fixtures to get lost ; consequently always ready for use. It has no equal. You cannot afford to be without them.

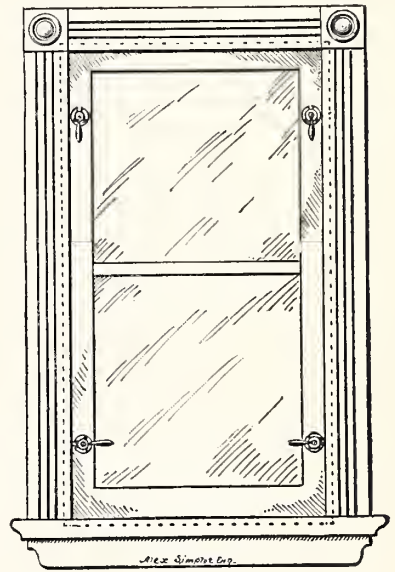

FIGURE 1.

IMPORTANT NOTICE.

When moulding is priced by the inch *it is in all cases understood* that the price is based on ripping width of lumber, that is: $\frac{1}{4}$ of an inch wider than the *finished size* of moulding. For example: A $\frac{7}{8}$ inch thick panel moulding if made to finish $1\frac{3}{4}$ inch wide would be charged as 2 inches (being ripping size); to finish full 2 inches, would be charged as $2\frac{1}{4}$ inch, etc.

Approximate weight of Mouldings, 1x1 inch, per 100 lineal feet, 15 pounds.
